

Journey Home

APPROACH: Journey Home works with adolescent males who have been unable to be successfully placed in a family setting. These youth typically exceed lengths of stay in other settings, yet with the appropriate supports and services they will be able to successfully transition home or to an intensive foster home. The goal of Journey Home is to provide brief intensive services while reintegrating the youth back into the community. Our trauma informed approach across all levels of services aids in the success of the youth.

CLINICAL: Our clinical approach is based on ARC building blocks incorporating DBT skills designed to meet the individualized needs of the youth and family. Clinical service delivery is family driven, youth guided and community focused. A menu of therapies and educational groups are offered to the youth during their stay at Journey Home.

ACADEMICS: Journey Home works in collaboration with the Attleboro School Department to insure that each youth has an appropriate educational plan and setting. Some of the youth attend the local neighborhood school while others may attend a day program. Journey Home employs a full time clinical case manager to coordinate all educational services. Additionally the program has access to educational consultants to advocate on behalf of the youth. In-house tutoring and MCAS preparation support is also available.

FOSTER CARE MATCH: During the stay at Journey Home we work diligently at matching a youth with a foster family from our intensive foster care program. We maintain that each youth needs a family-like setting where they can be nurtured and cared for by adults who can make a long-term commitment.

AT A GLANCE

FOCUS: A therapeutic group home for adolescent males who with support and treatment are ready to live and participate in the community.

CAPACITY: 18

GENDER: Male

AGE: 12-22
